

K&S advanced systems

The Most Advanced Vibration Absorption Systems

A lightweight and compact vibration absorption systems allows to significantly reduce unwanted vibrations translated to working environment from various environment disturbances. Developed by engineers, physicists, and leading industry consultants with expertise in vibration isolation and precision instruments, **SOTO** effectiveness at significantly absorb vibrations and disturbances.

SOTOxxx Products Line - Vibration Absorption Systems

SOTOxxx Products Line	Device Capabilities	Device Dimensions (mm)	Load Capacity (kg)
SOTO75	Vibration Absorption System	300x450x35	20 -75
SOTO150	Vibration Absorption System	400x500x80	30 -150
SOTO180	Vibration Absorption System	500x600x80	30 -180
SOTO200	Vibration Absorption System	600x800x80	30-200
SOTO1200	Vibration Absorption System Stationed on 4 independent isolators	200x200x75 single isolator	300 - 1200
SOTO2000	Vibration Absorption System Stationed on 4 independent isolators	200x200x75 single isolator	800 - 2000
SOTO4000	Vibration Absorption System Stationed on 8 independent isolators	200x200x75 single isolator	800 - 4000
